

Solemn Statement on the Prevention of Counterfeit Products

Dear SpeedyBee Partners and Users,

We have recently discovered counterfeit products circulating in the market that closely imitate our brand, including unauthorized replicas of our discontinued model, the SpeedyBee F405 V3 flight controller. These counterfeit items are not produced or endorsed by SpeedyBee. Not only do they infringe on the rights of consumers, but they also compromise the product quality standards we are committed to upholding. Furthermore, such actions constitute a serious violation of our intellectual property rights and harm our brand reputation. To safeguard the interests of our partners and consumers, and to help avoid unnecessary financial loss due to counterfeit purchases, we hereby issue the following official statement:

1. Official Product Identification

All genuine SpeedyBee products come with our official brand logo. Any item lacking this logo is not an authentic SpeedyBee product. The official logo is shown below:

2. Authorized Sales Channels

SpeedyBee has never authorized any third party to manufacture or sell the SpeedyBee F405 V3 model. All of our distributors are officially certified. To ensure product authenticity and receive full after-sales support, please purchase only through our official channels. Always retain your proof of purchase. If you are unsure about the authenticity of a product, you are welcome to contact our customer service for verification.

(Important Notice: Counterfeit products are not quality-guaranteed and may pose safety risks. We strongly advise against purchasing such items, even if offered at a low price.)

3. Legal Rights and Enforcement

Any individual or entity found manufacturing, distributing, or selling counterfeit SpeedyBee products is violating the legal rights of our company and our consumers. Such actions must cease immediately. SpeedyBee reserves the right to pursue legal action against all forms of infringement. We also encourage the community to work together to help maintain a fair and transparent market environment.

We urge all partners and consumers to remain vigilant and verify product authenticity. If you suspect that you have purchased a counterfeit product, please report it to your local authorities or contact us directly with relevant information via email:

contact@speedybee.com

Thank you for your continued trust and support.
